At Hanna, we believe that regardless of what may have happened in childhood, every person deserves the opportunity to pursue a happy, productive and fulfilled life.

We know that helping at-risk youth change the trajectory of their lives greatly impacts their quality of life - but also impacts the community by way of better health outcomes, decreased incarceration rates, and improved interpersonal relationships.

And we know that the collective power of agencies coming together with the skills necessary to help those who have experienced trauma changes the health outcomes of entire communities so much so that the Surgeon General of California has granted us $275,000 at Hanna to continue work in this area.

We also know that we couldn’t do this work without you. Thank you for supporting the work Hanna Boys Center does on campus, and out in the community to mitigate the effects of trauma.
38,745 donors in 2019-2020, we raised $2,400,000 on campus support.

392 people trained at the 2020 Hanna Institute Summit in the health care, education and non-profit sectors.
